DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian W. Brown on March 23, 2006.

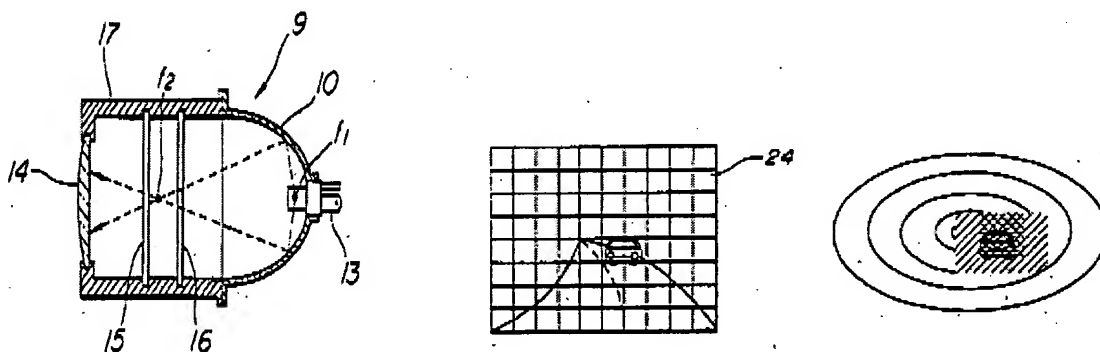

The application has been amended as follows:

Claims 1-10, 15, and 24-26 are canceled.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: claim 11 now recites "*a main beam headlight for a vehicle, comprising a first light source and a system for modulating the light there from, wherein the modulating system comprises an imager, a light guide for transporting the light from the light source to the imager, and an electronic system for generating masks on the imager for blocking light, wherein said electronic system comprises means for detecting in a road scene at least one person and means for generating said mask on the imager according to the detection of said at least one person*".

Seko et al. (USPN 4,985,816) teaches a first light source (13) and a system for modulating the light therefrom (e.g., Figure 1), wherein the modulating system (17) comprises an imager (15; crystal matrix/LCD), a light path (hollow inner structure within the reflector(s)), for transporting the light from the light source to the imager (15), and an electronic system (e.g., 20, 21, 22; Figure 2) for generating masks on the imager for blocking light (e.g., column 1, lines 55-60; "... a projector type vehicle headlamp which suppresses or at least minimizes the undesired "blinding phenomenon" to approaching drivers ... etc.").

Because none of the references disclosed the combination of a light guide for transporting the light from the light source to the imager & means for detecting and generating the mask on the imager according to the detection of the at least one person, nor is there any motivation to combine them, the claims are deemed patentable over the prior art of record.

Claims 11-14 and 16-23 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
